Den Friis & Moltke'ske formverden er markant i detalje som i helhed, og den står i stærk kontrast til mere traditionelle frembringelser i genren ved at samordne alle interiørets komponenter i et storkornet, skulpturelt modelleret og farvestrålende drama.

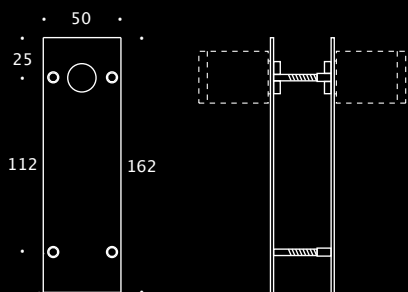

Deres valg af farver, former og overflader er ikke taget ud fra nøgterne mekaniske funktionskrav, men ud fra ønsket om en iscenesættelse med stor klangfuld effekt.

*Friis & Moltke are noted within the design world for their all-round attention to detail, often in stark contrast to more traditional designs within the sector in that they theme all components into a wholesome, sculptured and colourful drama.*

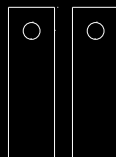

*Their choice of colours, shapes and finishes is not based on any particular functional requirements, but on a desire to create a more resonant effect.*
